## Diversification Can Break Down During Cyclical Declines

Many investors think that diversification alone is the key to creating a resilient portfolio. However, history indicates otherwise: In 2002 and 2008, times of heightened market risk, diversification provided little shelter from gyrating markets.

Instead of depending on diversification, Stadion makes data-driven investment decisions. Our continuous risk/return analysis helps us identify and choose ETFs with the most present-day potential and lowest risk—regardless of asset class.

## ETF Risk

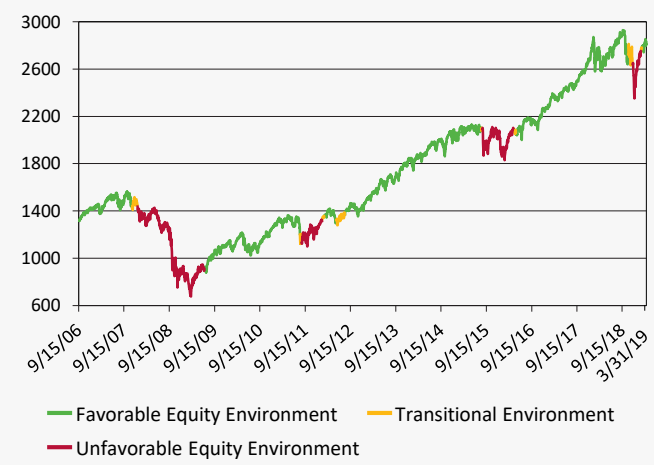

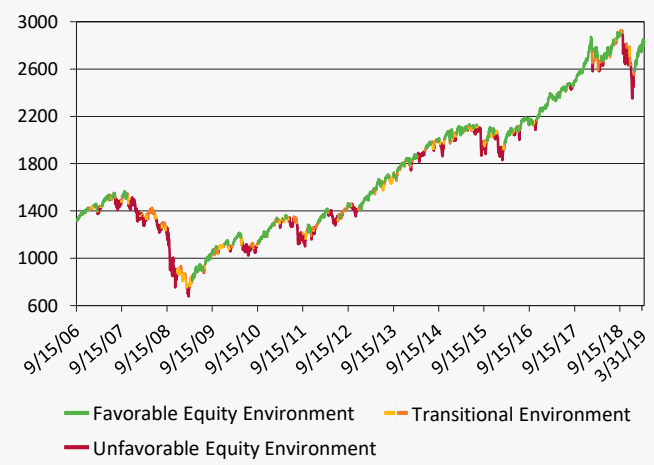

There are additional costs and potential risks associated with investing in domestic and international exchange-traded funds (ETFs). Investments in equities, including ETFs, are subject to market risks, sector risks, tracking risks, ETF net asset value and market price risks. Additionally, investors will indirectly bear fees and expenses charged by the underlying ETFs and investment companies in which a Stadion portfolio invests. International investing involves certain risks not usually associated with domestic investing, including currency fluctuation, economic and political volatility, foreign taxation and differences in financial standards.

**Emerging Markets:** The MSCI Emerging Markets Index is an unmanaged free float-adjusted market capitalization index that is designed to measure equity market performance of emerging markets. **International:** The MSCI EAFE Index (Europe, Australasia, Far East) is an unmanaged free float-adjusted market capitalization index that is designed to measure the equity market performance of developed markets, excluding the US & Canada. **Large Cap Growth:** S&P 500 Growth Index is a market-capitalization-weighted index developed by Standard and Poor's consisting of those stocks within the S&P 500 Index that exhibit strong growth characteristics. **Large Cap Value:** S&P 500 Value Index is a market-capitalization-weighted index developed by Standard and Poor's consisting of those stocks within the S&P 500 Index that exhibit strong value characteristics. The S&P 500 Index is the Standard & Poor's Composite Index of 500 stocks and is widely recognized, unmanaged index of common stock prices. **Small Cap:** The Russell 2000 Index measures the performance of the 2,000 smallest companies in the Russell 3000 Index, which represents approximately 8% of the total market capitalization of the Russell 3000 Index. **Small Cap Growth:** The Russell 2000 Growth Index measures the performance of those Russell 2000 companies with higher price-to-book ratios and higher forecasted growth values. **Small Cap Value:** The Russell 2000 Value Index measures the performance of those Russell 2000 companies with lower price-to-book ratios and lower forecasted growth values. It is not possible to invest directly in indexes (like the S&P 500) which are unmanaged and do not incur fees and charges. Investments are subject to risk and any of Stadion's investment strategies may lose money. Performance data quotes represents past performance. Past performance is no guarantee of future results.

## Being Tactically Defensive Can Help

### Stadion Tactical Defensive Fund can become 100% defensive.

The Stadion Tactical Defensive Fund brings together two complementary components to diversify equity allocations and attempt to reduce volatility over changing market cycles. The Tactical Defensive Fund is designed to respond to changing market conditions, not predict them.

Component 1: Cyclical Trends	Component 2: Shorter Term Trends

There is no guarantee that these investment strategies will succeed; the strategies are not an indicator of future performance and investment results may vary. The investment strategies presented are not appropriate for every investor and individual clients should review with their financial advisors the terms and conditions and risk involved with specific products or services. Stadion's actively managed portfolios may underperform during bull markets. The S&P Index is the Standard & Poor's Composite Index of 500 stocks and is a widely recognized, unmanaged index of common stock prices. It is not possible to invest directly in indexes (like the S&P 500) which are unmanaged and do not incur fees and charges. The graphs do not include Stadion's performance. They set forth the "risk levels" in the market, as determined by Stadion's investment models, for those periods. An investor should consider the investment objectives, risks, and charges and expenses of the Stadion funds carefully before investing. The prospectus contains this and other information about the funds. A copy of the prospectus is available by calling the Trust directly at (866) 383-7636 or Stadion Money Management, LLC, the investment advisor, at (800) 222-7636. The prospectus should be read carefully before investing. The prospectus is also available for your review at [www.stadionfunds.com](http://www.stadionfunds.com).

Investment in the Fund is subject to investment risks, including, without limitation, market risk, management style risk, risks related to "fund of funds" structure, sector risk, fixed income risk, tracking risk, risks related to ETF net asset value and market price, foreign securities risk, risks related to portfolio turnover and small capitalization companies risk. Since the Fund is a "fund of funds," an investor will indirectly bear fees and expenses charged by the underlying ETFs and investment companies in which the Fund invests in addition to the Fund's direct fees and expenses. More information about these risks and other risks can be found in the Fund's prospectus.

Stadion Money Management, LLC (the "Adviser") has entered into an Expense Limitation Agreement with the Fund under which it has contractually agreed to waive Management Fees and to assume other expenses of the Fund, if necessary, in an amount that limits annual operating expenses (exclusive of interest, taxes, brokerage commissions, extraordinary expenses, Acquired Fund Fees and Expenses and payments, if any, under a Rule 12b-1 Distribution Plan) of Class A, Class C and Class I shares to not more than 1.70% of the average daily net assets allocable to each Class of the Fund. The Expense Limitation Agreement is currently in effect until October 1, 2019. The Expense Limitation Agreement may be terminated by the Trust or the Adviser at the end of its then-current term upon not less than 90 days' notice. The Fund's performance has been positively impacted by these Expense Limitation Agreements. For any such purchases where a finder's fee is paid by the Adviser a contingent deferred sales charge (CDSC) will be charged at the time of redemption if the shares are redeemed within 12 months of the purchase date. The CDSC will be based on the original purchase cost or the current market value of the shares being sold, whichever is less. A 1.00% CDSC will be assessed on class C shares purchased on or after October 1, 2012 and redeemed within 12 months of purchase. The Current Expense Ratio does not include Acquired Fund Fees and Expenses. Risk Statistics shown are for 9/15/06 – 3/31/19.

The Stadion Funds are distributed by ALPS Distributors, Inc. Stadion and the Stadion S are a registered service mark of Stadion Money Management, LLC.

Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results. The Morningstar Rating for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed end funds, and separate accounts) with at least a three-year history. Exchange traded funds and open ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10 year (if applicable) Morningstar Rating metrics. The weights are 100% three-year rating for 36-59 months of total returns, 60% five year rating/40%three-year rating for 60-119 months of total returns, and 50% 10 year rating/30%five-year rating/20%three year rating for 120 or more months of total returns. While the 10 year overall rating formula seems to give the most weight to the 10 year period, the most recent three -year period actually has the greatest impact because it is included in all three rating periods. Stadion Tactical Defensive Fund was rated against the following numbers of U.S.-domiciled Tactical Allocation over the following time periods: 230 funds in the last three years, 171 funds in the last five years, and 55 funds in the last ten years. With respect to these Tactical Allocation funds, the Stadion Tactical Defensive Fund received a Morningstar Rating of 5 stars, 4 stars, and 3 stars for the three-, five-, and ten-year periods, respectively. Stadion Tactical Defensive Fund: 4 star overall rating out of 230 Tactical Allocation funds as of 3/31/19. Past performance is no guarantee of future results. Morningstar Rating is for the I share class only; other classes may have different performance characteristics. Extended performance is an estimate based on the performance of the fund's oldest share class, adjusted for fees. The Morningstar Tactical Allocation Category is a benchmark created and published by Morningstar and is defined as "Portfolios seek to provide capital appreciation and income by actively shifting allocations between asset classes."

Standard Deviation measures the average deviation of a return series from its mean, and is often used as a measure of risk. Beta is a measure of systematic risk, or the sensitivity of a manager to movements in the benchmark. A beta of 1 implies that you can expect movement of a manager's return series to match that of the benchmark used to measure beta. Correlation is a measure of how investments move in relation to one another. A correlation of 1 means the two asset classes move exactly in line with each other, while a correlation of -1 means they move in the exact opposite direction. The Morningstar Target Risk Index family is designed to meet the needs of investors who would like to maintain a target level of equity exposure through a portfolio diversified across equities, bonds and inflation-hedged instruments. The Morningstar Moderate Target Risk Index seeks approximately 60% global equity exposure. ©2019 Morningstar. All Rights Reserved. The S&P 500 Index is an unmanaged index considered representative of the U.S. stock market. The indexes are not available for direct investment and there are no trading expenses associated with the indexes. In 2011, Long Term Measure was added as a risk management indicator.
